Professional Experience

Police Officer

2016 – 2023

City of Dover, NH
Town of Farmington, NH

- Studied, learned, and applied applicable state and local laws and ordinances to serve and protect the community
- Cultivated and maintained positive working relationships with colleagues and diverse community stakeholders through effective communication and community-based policing efforts
- Navigated and resolved complex crises with steadfast professionalism, integrity, and empathy
- Conducted investigations by gathering evidence, interviewing involved parties, and analyzing information
- Drafted reports with observations, actions, and recommendations in accordance with department policies and procedures
- Provided courtroom testimonies to corroborate evidence related to violations against state law
- Trained and evaluated recruits as a certified Field Training Officer in compliance with state laws as well as professional standards adhering to the Commission of Accredited Law Enforcement Agencies (CALEA)

Procurement Analyst

2011 – 2016

Paradigm Precision

- Coordinated material movement between internal teams and outside suppliers for various aerospace engine components in compliance with ISO 9000 professional standards
- Exercised effective negotiation strategies in a fast-paced environment with a focus on customer needs
- Supervised logistical routes and pathways for driver transportation efficiency

Projects

Meet App | Project lead

Full stack web developer

2023

A progressive web app built with React. Test-driven using Jest, the backend utilizes AWS Lambda functioning to fetch data from Google Calendar API to display CareerFoundry's global events calendar

ChatterBox | Project lead

Full stack web developer

2023

A mobile chat app built with React Native and Android Studio. This app provides users with a customizable chat interface and allows for image and location sharing with friends.

myFlix | Project lead

Full stack web developer

2023

A functioning web app developed with the MERN stack (MongoDB, Express, React, Node.js) which provides users with information on movies. Users can register an account, update their profile, as well as create a list of favorite movies.
